Flooring Surface

Profile of Coatings

7-12 layers quality lacquer,low emission,unique color,better anti-scratch

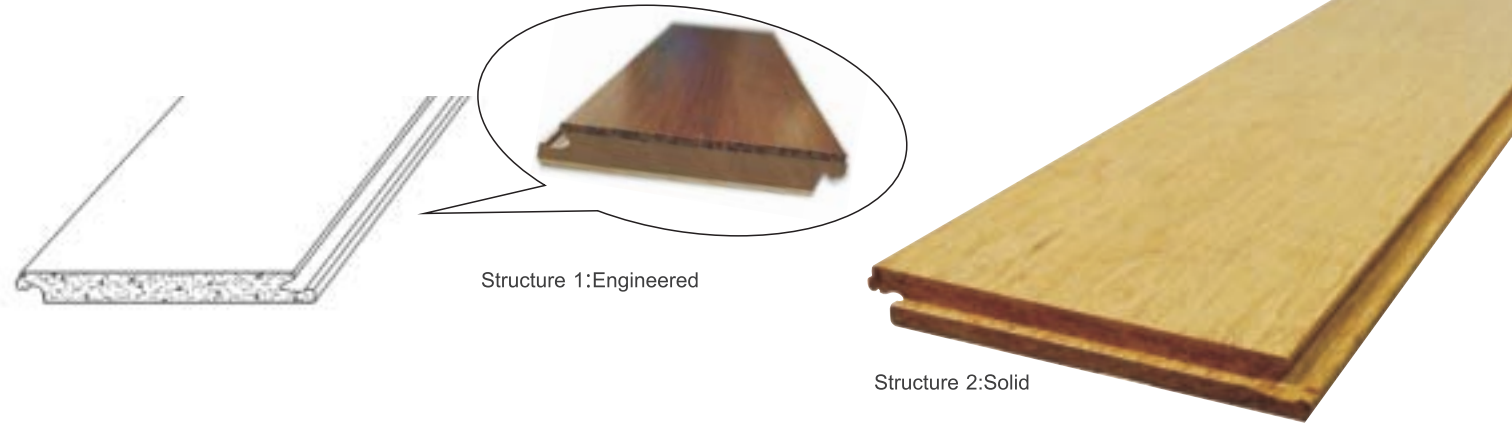

- 1.Water based Primer
- 2.Lubrication primer
- 3.Heavy Putty
- 4.UV Normal Primer
- 5.Light Putty
- 6.Anti-abrasive primer
- 7.Transparent elastic primer
- 8.UV Normal Primer
- 9.Sanding primer
- 10.Back lacquer
- 11.Anti-abrasive primer(color)
- 12.Anti-scratch primer(gloss)

Different Finish

- Natural color
The surface is without any special treatment, just 7-12 layers of transparent lacquer. Thus pure bamboo color and real bamboo grain comes without any disturbing elements to this style. Inspiration comes from nature's tranquil palette, creating a cool interior look.
- Stained color
Stained color process just like make-up, could bring the floor with rich apperance. For light stained,we could get both the natural bamboo grain and beautiful coating . For dark color is very attractive alternative to many design.
- Carbonized
The bamboo is under high temperature and high press for carbonization.
 - The bamboo organic can be decomposed, no insect or fungi can grow in it. And under the circumstance, the color of bamboo change to teak color which looks more beautiful.
 - Carbonized floor is more stable, for it decreases the moisture absorption and internal stress of bamboo.
- Textured surface: brushed, handscraped, wood grain
Bamboo surface grain is emphasised by the special treatment.It is an antique look.This flooring is a unique combination of craftman-ship and selected raw materials. Most floor is usually a mix of light brushing, staining, sanding and coloured oil etc.

Strand woven bamboo flooring

100% solid, made of bamboo fiber and press under 2400T preasure. Density & hardness is almost twice than solid bamboo, more stable & durability.natural wood feeling

Solid bamboo flooring--Horizontal

Assembled by selected bamboo strips, horizontal structure,with bamboo knots, natural wood feeling material, environmental friendly,affordable price

Solid bamboo flooring--Vertical

Assembled by selected bamboo strips, vertical structure,with bamboo knots, natural wood feeling material, environmental friendly,affordable price

ACCESSORIES

Wall Base:
A decorative molding that is nailed to the walls on top of the flooring, or it can be used with quarter round.

Quarter Round:
Used along the base of the walls against the wood baseboard to cover the required expansion gap between the flooring and the wall.

Threshold:
Used in doorways, at sliding doors, against fireplaces, etc. when abutting joining rooms that have floors of different heights.

Reducer:
Used to smoothly taper the edge of the wood floor down onto another surface.

T-molding:
Used as a transition piece between two floors that are of the same height.

Stair Nosing:
used on the front edge of a step.

Stair Tread:
used on the front edge of a step.

Bamboo plywood is made of fine layers of bamboo strips laying in parallel order. The strips are kiln dried, sanded smooth and then laminated edge to edge to create a single-ply panel. These panels are then laminated again to each other to create a multi-ply bamboo plywood with free formaldehyde emission. The multi layers are cross-laminated and heat pressed together to provide stability and to prevent warping. 3-4 times more dimensionally stable than Oak. Bamboo plywood comes in unfinished sheets.

Bamboo Plywood Grain: Horizontal or Vertical or Strand Woven
Bamboo Plywood Color: Natural or Carbonized

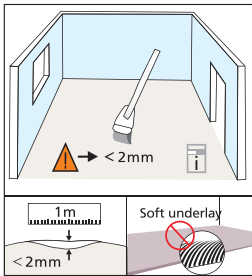

Solid Bamboo Plywood Dimensions

Installation

NOTE: Please examine all the flooring before installing for the colour, finish, quality and style. The manufacturer will not assume any responsibility for the above once the product has been installed.

Care and Maintenance

Detailed Care Maintenance Tips:

DO:

- Wipe up liquid or food spills promptly with dry cloth or paper towels.
- Remove sticky residue (like jelly) with a slightly dampened cloth.
- For general cleaning add 1/4 cup of white vinegar to 1 quart of warm water.
- Daily Cleaning: Remove loose dirt and grit, dust mop, broom sweep, electric broom or vacuum.
- Use interior and exterior doormats at entrances to collect dirt and moisture and prevent it from being tracked onto the floor.
- Area rugs are recommended in front of kitchen sinks, at all pivot points and within high-traffic areas. The rugs must be made of a breathable material to prevent moisture entrapment.
- Place runners and area rugs (with slip-resistant backings) along high-traffic areas.
- Keep animal nails trimmed to prevent finish scratches.
- To prevent surface damage avoid rolling heavy appliances and furniture on the floor. Use plywood hardboard or appliance lifts, if necessary.
- Use furniture leg protector pads under all furniture legs.
- Replace hard, narrow furniture rollers with wide rubber rollers.
- Keep the relative humidity in your home between 45% and 65%.
- Protect your floor from direct sunlight.
- Please make sure that the temperature and humidity are moderate in the room.

DON'T:

- Use any of the following products (or products similar in nature) on your floor: ammonia based cleaners, acrylic finishes, wax based products, detergents, bleach, polishes and oil soaps, abrasive cleaning soaps or acidic materials such as vinegar.
- Allow water to stand on your floor for any length of time – wipe up immediately.
- Walk across your floor in poorly maintained shoes with heel taps, spike heels or with any sharp object protruding from your shoe.
- Allow furniture to rest on the floor on small metal tips or hard domes.
- Use rubber, foam back or plastic mats as they may trap moisture and possibly discolor your floor.
- Use vacuums with beater bars or hard heads.
- Allow “spike heel” type shoes to indent wood floors, especially if the heel tip is damaged or has lost its rubber pad.
- Leave your flooring exposed to direct sunlight for long periods of time.

Limited Warranty

-A 25 year Structural Integrity Warranty
-A 5 year finish and wear warranty
These warranties, which begin from the date of purchase, apply to products used in dry residential applications.

Warranty Coverage:
Finish and Wear Warranty ----We warrant that its finish surface will not peel off or wear through for the indicated period of time, from the date of purchase.
Structural Integrity Warranty--- We warrant that these solid bamboo products in their original manufactured conditions are free from defect in material and workmanship including assembly dimension and grading.

- These warranties DO NOT COVER damages or defects resulting from or in any way attributed to:**
- Improper storage, handling or installation of the products.
 - Excessive or inadequate humidity in the area. Relative humidity in the area of use should be within a normal range of 45%-65%.
 - Abuse, lack of maintenance, neglect, abnormal use or misuse, negligence, corrosive chemicals and other unintended uses.
 - Failure due to structural changes in the sub-floor, the settling of building or uneven sub-floor that has not been adequately leveled.
 - Variations in color, markings, patterns, fading or darkening that are naturally occurring or develop over time.
 - Damage caused during shipping is the responsibility of the shipping company.
 - Dents or scratches.
 - Changes in color due to full or partial exposure to sunlight and weather.
 - Separations between boards caused by expansion and contract during seasonal and temperature changes.
 - Installation or use of flooring with visible defects.

Client Testimony

Selim from USA on Tap&Go Installtation
This is one of the best products we have used in the USA so far.The installation of this flooring is the easiest process as long as you follow the video guide they send you. You do not need professional labor to do the installation. Any handyman or you yourself can install it. If you have any Mexicans working for you, it should not cost you more than \$.50/ sq. ft. The only thing is that you have to ensure your surface is even and flat. Even slight variations are not acceptable. The surface must be flat and even. It applies to any hardwood floor.
Also, make sure that you order transition strips and baseboards with your flooring.
Bright is very professional and honest person. He is very reliable and is a pleasure to work with. We highly recommend him and his company.

Fabio from Argentina on Strandwoven bamboo floor
The product is something completely new in the market but is very well accepted.I can say one is tried it is adopted,we are having a continious growth of this line 25% monthly,people start to talk about strandwoven bamboo floor as the " new wonderful product"
Considering the growth of the product I can think we will reach 2 containers/month for 2nd semester next year.

Eddy from Rwanda on Oak wood floor
Thank you very much for making this beautiful engineered flooring wood. A good rich looking and a good multi-layer structure. The appearance is so beautiful.

Glenn from Canada on Acacai wood floor
So far all the ACACIA wood floor seems to be good quality with no difficulty.The pad is good too.

Bergeim Integrated Manufacturing Base

” Bergeim Integrated Manufacturing Base" contains constructing one million acres of modern forestry base, rebuilding and upgrading 280 thousand square meters of environmentally friendly core production base, enlarging 20 million square meters of low-carbon ecotypic flooring manufacturing base, setting up large-scale modern furniture production base, developing one million acres of forestry and industry three-dimensional project, and building ten thousand square meters of modern research and development center and ten thousand square meters of modern display center. The total investment reaches several billion yuan. Also, the whole construction of the production base was strictly following international standards ISO19001,ISO140001, CE Authentication, and CARB Authentication. "Bergeim Integrated Manufacturing Base" is an industrial model factory integrating garden workshop, ecotypic flats, automatic power-saving manufacturing pile line, and dustless workshop.

How to Select the Real Valuable Flooring?

Tip 1

✗ One piece = The whole flooring

The quality of one piece of flooring is equal to those of the Whole flooring after installation.

✓ One piece ≠ The whole flooring

Fact: Actually, the quality of one piece of flooring is just one aspect of overall effect of the whole flooring after installation.

The real valuable flooring not only demands single plank is beautiful, healthy and durable, but also requires the whole flooring gap, separation and warp resistant for long-time use after installation. Otherwise it will be easy to get dusty and grow germ in the joint, and no longer keep artistic, healthy or durable.

Tip 2

✗ Construction quality=Installation quality

✓ Construction quality + Floor joint technology= Installation quality

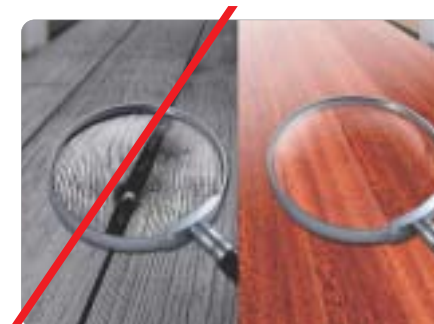

Fact: The installation technology plays a decisive role especially in heating floor system. Superior joint technology is a key factor in preventing separation and gap problems between the flooring.

Tip 3

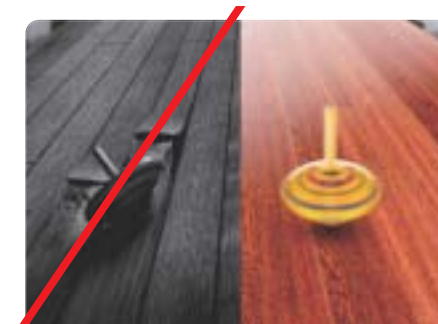

✗ The higher price of floors = The higher purchase cost

✓ The purchase cost= Material cost + Installation cost + Usage cost

Fact: The consumers' real purchase cost is hugely influenced by the installation cost and the usage cost like maintenance cost, warranty, psychology feeling, effect to health, etc.

Gap-Resistant

Warp-Resistant

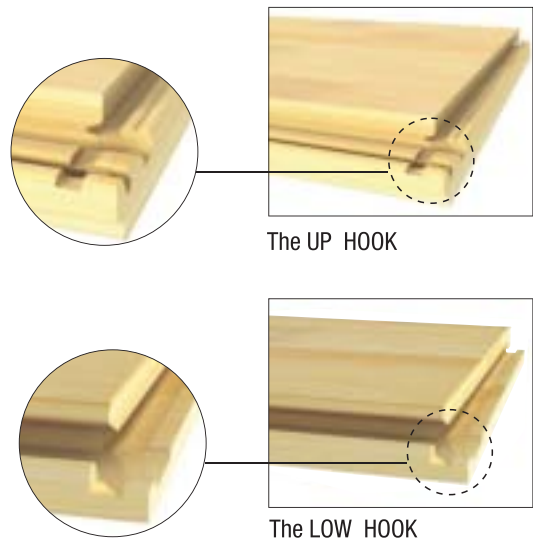

Separation-Resistant

- One of three **world-class** flooring click patent;
- Innovative hook joint structure with **smart groove**, to be installed by vertical tapping along edges of the planks.
- **Most Advanced** Locking system, particularly good for **wood and bamboo floors**.

Structure

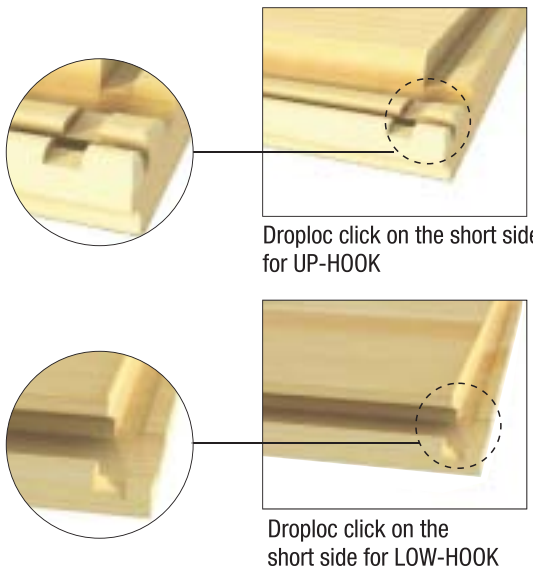

1. 4-side Lock:

The elasticity groove design is applied in both long and short end sides. TAP&GO's special 4 sides' Locking technology ensures the installed floors hard to dispart after installation while other locking floorings are easily apart rom short ends.

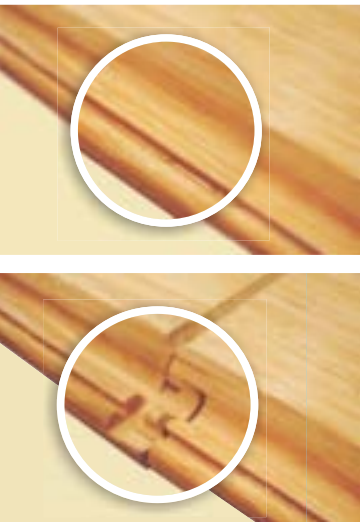

2. Drop lock structure:

It is provided for more option to the customer with less tap, especially the DIY home users who have less experience of installation. The combination of the drop lock short side with the original strong long side still gives perfect performance on the final installation effect.

Advantages

1) Trusted Quality Material

TAP&GO floors adopted high quality raw materials, excellent technology and advanced equipment.

2) Stronger Locking

The wider and deeper design of TAP&GO locking system makes TAP&GO locking much stronger, no loosing or departing. Meanwhile, the intelligent Groove in the up hook is an innovative technology, which enables the hook shrink and expands with good elasticity, and makes planks truly firmly locked together.

3) Easier installation

To be simply installed by tapping-in the edge of the planks, One person with one rubber mallet is all needed.

4) Eco-Friendly

• Low formaldehyde

TAP&GO locking flooring formaldehyde emission rate is far below than the the normal or low quality ones. Moreover, Tap&Go locking installation requires no glue, which makes the floor more natural and safe.
